Chapter 1: Function Transformations

Translation of Functions 3
Dilation of Functions 14
Reflection of Functions 21
Absolute Value of Functions 25
Composition of Functions 29
Inverses of Functions 34
Transformation Challenge 39

Chapter 2: Circular Functions

Introduction to Radians 43
Trigonometry Tracers 46
Six Circular Functions 50
Transformations of Circular Functions 54
Sine Challenge 56

Chapter 3: Trigonometric Properties

The Law of Sines 61
Triangles and Squares: The Law of Cosines 63
Sums of Sinusoidal Functions 67
Products of Sinusoidal Functions 74

Chapter 4: Other Functions

Exploring the Roots of Quadratics 81
Analytic Conics 85
Parametric Functions 89
Surfaces 94
Compound Interest 98
Slopes of Exponential Functions 102
A Sequence Approach to Logs 105
Semilog Graphs 108
Log-Log Graphs 114
The Logistic Function 119

Chapter 5: Data and Probability

Linear Regression 127
Wait for a Date 131

© 2012 Key Curriculum Press

Fitting Polynomial Functions 135
Barnsley's Fractal Fern 139

Chapter 6: Vectors and Matrices

Matrix Transformations 147
Vector Operations 150
Matrix Products 154
Coordinates in Three Dimensions 159
Parametric Functions in Three Dimensions 164
Vector Operations in Three Dimensions 169
Matrix Transformations in Three Dimensions 173
Matrix Products in Three Dimensions 177

Chapter 7: Polar Coordinates and Complex Numbers

Introduction to Polar Coordinates 183
Cartesian Graphs and Polar Graphs 187
Multiplication of Complex Numbers 191
In Search of Buried Treasure 195
Transformations in the Complex Plane 199
Powers of Complex Numbers 201
A Geometric Approach to $e^{i\pi}$ 205

Chapter 8: Sequences and Series

Generating Arithmetic and Geometric Sequences Numerically 211
Area Models of Geometric Series 214
A Geometric Series Coil 219
A Geometric Series Staircase 223
Taylor Series 226

Chapter 9: Introduction to Calculus

Tracing the Slope Function 233
Instantaneous Rate 241
One Type of Integral 245
Rectangular and Trapezoidal Accumulation 249
Limits with Tables 252
Limits with Delta and Epsilon 255
Manually Probing the Antiderivative 258
Automatically Probing the Antiderivative 261
